Malak Abu Omar

Full-Stack Web Developer | Backend Developer
Riyadh, Saudi Arabia | malakmuayad15@gmail.com | LinkedIn | GitHub

Professional Summary

Full-Stack Developer with hands-on experience building RESTful APIs and web applications using C#, ASP.NET Core, SQL Server, React, and TypeScript. Experienced in authentication, relational database design, 3-tier architecture, and collaborative open-source development through peer-reviewed GitHub contributions.

Skills

- **Languages**: C++, C#, JavaScript, TypeScript, SQL, T-SQL
- **Backend**: ASP.NET Core Web API, .NET 8, .NET Framework, ADO.NET, Entity Framework Core, Windows Services
- **Frontend**: HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, React
- **Databases & Architecture**: MS SQL Server, Relational Database Design, 3-Tier Architecture, RESTful API Design
- **Tools**: Git, GitHub, Swagger/OpenAPI, Copilot
- **Soft Skills**: Goal-Setting, Teamwork

Experience

Frontend Developer Intern | Appverse Technologies - Remote Oct 2026 - Present

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript (ES6+).
- Implemented an e-commerce data transformation pipeline to process and analyze order data using JavaScript.

Projects

Saay – Full-Stack Productivity Web Application | GitHub | Live Demo | ASP.NET Core, C#, SQL Server, React, TypeScript, Tailwind CSS Aug – Oct 2026

- Developed a full-stack productivity application for managing tasks, personal goals, and habits using React and ASP.NET Core.
- Built RESTful APIs and implemented JWT authentication, refresh tokens, and role-based or ownership-based access controls, as applicable to each endpoint.
- Designed and managed relational database entities for users, tasks, goals, habits, and related application features.
- Implemented email confirmation, password reset, and bilingual Arabic/English support with responsive layouts and dark/light themes.
- Integrated an AI-powered chatbot to assist users with productivity-related queries.

TaskFlow – Task Management Application | GitHub | Live Demo | React, TypeScript, Tailwind CSS

- Developed a responsive Task Management SPA using React, TypeScript, and Tailwind CSS with light/dark theme support.
- IImplemented IndexedDB persistence, offline support, PDF report generation, and light/dark themes.

Country Explorer – Web Application | GitHub | Live Demo | Vanilla JavaScript, TypeScript, Tailwind CSS, REST APIs Jul 2026

- Developed a responsive country discovery web platform consuming the REST Countries API.
- Integrated regional filtering, search indexing, pagination, detailed country views, and persistent local storage favorites.

Library System API – RESTful Backend Service | GitHub | ASP.NET Core, .NET 8 Nov 2025 – Apr 2026

- Architected a 3-tier RESTful API for managing books, system members, and transaction history using ASP.NET Core 8 and MS SQL Server.
- Implemented secure JWT authentication and Role-Based Access Control (RBAC) to enforce system authorization.
- Documented, tested, and validated all API endpoints using Swagger/OpenAPI.

Hospital Management System – Desktop Application | GitHub | WinForms, ADO.NET Jul 2025 – Jan 2026

- Developed a desktop healthcare management system utilizing C#, WinForms, and SQL Server via ADO.NET.
- Enforced data security policies by integrating secure password hashing and encryption algorithms.
- Built a dedicated background Windows Service to automate SMS appointment notifications.

Open-Source Contributions

RATQ Open-Source Contributor | PR #262 | PR #274 | React, TypeScript, Git, GitHub Aug 2026

- Contributed to an open-source React/TypeScript codebase through peer-reviewed GitHub Pull Requests.
- Developed a reusable Toast Notification UI component integrated across the core application.
- Enhanced client-side authorization and ownership validation UI features for authenticated users.
- Participated actively in code reviews, issue discussions, and collaborative software development flows.

Education

Bachelor of Computer Science Sep 2023 - Jan 2028

University of the People

- Academic Honors: Recognized on the President's List for multiple academic terms.

Certifications & Courses

- ProgrammingAdvices Academy (Mar 2024 – Aug 2026): Completed 32 courses covering C#, .NET Core, ASP.NET Web API, SQL Server, ADO.NET, EF Core, REST APIs, Clean Code, SOLID Principles, Data Structures & Algorithms, and Architecture Design Patterns.
- Management Dose Academy (Aug 2026): Finished the Crafting and Achieving Your Objectives course.
- AI Skills Fest 2026 – Microsoft (Jun 2026): Completed the GitHub Copilot applied skill.

Languages

- Arabic (Native)
- English (Fluent)
